## USES & APPLICATIONS

-  Factories, warehouses and stores
-  Public or private parking
-  Hotels and shopping centers
-  Unattended installations
-  Stores
-  Office buildings
-  Houses

GUINAZ IP technology allows to solve any installation from the smallest to the largest housing project or office, using structured cabling network, which eliminates any distance limitation and enabling the management, control and system repair not in person.

Multiple facilities control through a checkpoint. Gas stations, parkings or phone repeaters that are located miles away from each other can be managed from a distance. Getting a communication that can solve any problem quickly and directly.

Video management through software of video surveillance. Possibility of integration of video management systems, visualization and CCTV cameras control in all types of public buildings, Milestone type, Scati ...

Possibility of opening doors and / or gates remotely via smartphone, tablet or any smart device or computer

Managing multiple calls internally through telephone / computer or IP Concierge, allowing call forwarding from a receiving station to each user of an office building or even homes that have concierge.

*The future of internal communication*

- Unlimited capacity
- Unlimited distances
- Potential diversion outside local network
- Maximum capacity for integration

Remote surveillance. Viewing different CCTV cameras across the IP-SiP "SMARTIVE" monitor and / or any other smart device.
